Biographical Note:

Frank Marion Townsend was born October 29, 1914 in Stamford, Texas, and died October 31, 2001 in Harwood, Texas. He completed his premedical studies at San Antonio College and the University of Texas, and received his M.D. from Tulane University in 1938.

Dr. Townsend began his military career in 1933 with the Texas National Guard. He was commissioned as a 1st Lieutenant in the US Army’s Medical Corps in 1940; in 1950 he transitioned to the US Air Force as a Lt. Colonel and achieved the rank of Colonel in 1956. Dr. Townsend’s military assignments included (among others) Ft. Amador Hospital in the Canal Zone; Lackland, Bolling, and Brooks Air Force Bases; the Office of the Surgeon General; and the Armed Forces Institute of Pathology in Washington, DC where he served as Deputy Director (1955-1959) and Director (1959-1963).

Dr. Townsend received many awards and honors during his career, including the Founder’s Medal from the Association of Military Surgeons of the United States; the Harry G. Moseley Award for the most outstanding contribution to flight safety in 1962; the Physician’s Recognition Award from the American Medical Association; The Department of Defense Distinguished Service Medal; and the Ward Burdick Award from the American Society of Clinical Pathologists. In addition, he held membership and honorary membership in dozens of scientific societies and fraternities and was a Fellow in many more. He was a participant in founding the Joint Committee on Aviation Pathology and was a member of the Project Mercury aerospace medical personnel team. He was a prolific writer, authoring and co-authoring dozens of articles primarily on aviation pathology but also gynecologic pathology and other topics. He was an active participant and lecturer at hundreds of conferences and meetings on pathology in general and aviation pathology in particular. He retired from the Air Force in 1965 after 25 years of military service.
In 1969 Dr. Townsend was appointed Clinical Professor in the Department of Pathology at the University of Texas’ new medical school at San Antonio. In 1972 he was appointed Chair of the Department, and oversaw the development of the Department of Pathology at the University’s Health Science Center, taking the staff from an original three to 55 faculty members in 1986, when he retired. The University established the Frank M. Townsend, MD Pathology Chair in 1999. During his tenure at Texas, he remained active as a consultant to the Armed Forces Institute of Pathology and served on its Board of Directors.

Series/Scope and Content Note:

The collection was donated by Dr. Townsend in 1992 and contains correspondence, personal and published papers, duty orders, travel documents, and photographs from Dr. Townsend’s military career. Notable among the collection are records of his involvement in Project Mercury, his papers in the field of aviation safety and pathology, his statement to the US Senate about the proposed move of the Armed Forces Institute of Pathology, and information about the Centennial Celebration of the Armed Forces Institute of Pathology. The collection was processed as found and is only partially arranged. See also: AFIP Historical Files
