NAVY MEDICINE'S R&D: A GLOBAL ENTERPRISE

Courtesy Naval Medical Research Center

Thousands of America's finest young men and women are stationed around the world with boots on the ground or aboard ships, submarines and aircraft. Navy Medicine's research has a direct impact on the health and medical readiness of these Sailors and Marines. From research in infectious diseases, biological defense, combat casualty care, military operational and expeditionary medicine, bone marrow transplantation, and aerospace, submarine, and diving medicine, Navy Medicine is committed to translating discoveries at the bench and in the field into products for the Navy and Marine Corps. John W. Sanders, M.D., Commanding Officer of the Naval Medical Research Center, Silver Spring, Maryland, will share more about Navy Medicine and the role it plays in global health.

TUESDAY, OCTOBER 28, 2014

6 - 7 PM

Silver Spring Civic Building - Fenton Room

1 Veterans Place, Silver Spring, Maryland 20910

National Museum of Health and Medicine
