Sept. 26 Wed
Had a good night's
sleep last night and
feel fine today. It is
cool and pleasant
but just a bit hazy.
The darker the night
the better we like it
as the subs can't see
us so there is not near
as much danger.
We have traveled
267 miles today.
That puts us 1141
miles from Halifax
and it is 2400 miles
from Halifax to Liverpool.
We had target practice
this afternoon at 3
o'clock and our guns
did some good shooting
especially the aft one.

1 The Mongolia is my ship,
I shall not sink!

2 It maketh me to lie
down in life belts; it
leadeth me through
troubled waters.

3 It restreth my courage;
it leadeth me in the
path of safety for its
own safety sake.

4 Yea though I go
through the region
of the valley of the
shadow of death, I
will fear no evil;
for thy speed and thy
convoy they comfort me.

5 Thou layest a course
before me in the presence
of mine enemies;
Thou fillest my heart

All slight wounds, Oct,
I went around and
looked after them this
A.M. and have several
