OHA 298 Seeley Philippines Lantern Slide Collection

Accession Numbers: NMHM 1990.0025; M-360.091

Date of Records: 1930s

Size: 1 box; 1 linear foot

Finding Aid: by Laura Cutter, 2013

Access and Use: The Otis Historical Archives is committed to providing open access to its collections as far as possible within the limits of privacy and confidentiality. Some of the material in this collection may be restricted. Access to this collection is at the discretion of the Otis Historical Archives and material contained within the records may be subject to review before access is granted.

Scope and Content: This collection consists of 70 glass lantern slides (film positives) of the Philippines during the 1930s. They were prepared and donated by Brigadier General Sam Seeley, Medical Corps, who served as a Regimental Medical Officer and later at the Station Hospital, Ft. McKinley, Manila, Philippine Islands. Approximately one third of the slides document diseases such as leprosy, rickets, and filariasis (elephantiasis). The remainders of the images show buildings, street life, animals, insects, people, and scenes of everyday life in the Philippines. The slides were identified in 1979 by the donor and they have not been altered to reflected modern terminology or geographical names.

BOX AND CONTENT LIST

Box 001:

Slide: **Description:**

- 00001 Dysentery admissions (Enl.--PI) per 1,000 per annum 1914-1933
