Access and Use: The Otis Historical Archives is committed to providing open access to its collections as far as possible within the limits of privacy and confidentiality. Access to this collection is at the discretion of the Otis Historical Archives and material contained within the records may be subject to review before access is granted.

Series/Scope and Content Note: This collection consists of photographs of wet specimens (preserved in liquid), primarily intestines, taken at the Museum during and after the Civil War. The numbering system, which was used in the 1867 Museum Catalogue, was later subsumed into the Pathological Series. Many of the photographs were bound in a volume titled "Camp Fever and Camp Dysentery."
