

MEDICAL MUSEUM SCIENCE CAFÉ

THE SCIENCE AND ART OF FORENSIC FACIAL RECONSTRUCTION

Learn how 3-D modeling and forensic anthropology intersect to reveal the face of an unknown Civil War soldier. Using CT data of a skull discovered in 1876 on Morris Island, South Carolina, near the site of Battery Wagner, a forensic artist and a biomedical engineer worked together to create a facial reconstruction of the soldier. He is believed to be a soldier of the famous 54th Massachusetts Volunteers, which led its assault on Wagner the night of July 18, 1863.

TUESDAY, MAY 27, 2014

6-7 PM

**WHERE: NATIONAL MUSEUM OF HEALTH AND MEDICINE
2500 Linden Lane, Silver Spring, Maryland 20910**

FREE! Open to the public, no RSVP required. *NOTE LOCATION CHANGE!*
