Preliminary Analysis of Trauma Knowledge, Skills & Attitudes at the Navy Trauma Training Center

At the Navy's premier military-civilian trauma training partnership, located at the Navy Trauma Training Center at the Los Angeles County+University of Southern California Medical Center, there is a small cadre of expert Navy clinicians who are embedded as trainers to provide courses for rotating personnel. Join Navy Commander Tony Torres, a nurse researcher, to hear about his ongoing research to evaluate the knowledge, skills, and attitudes of participants to allow for a more quantitative understanding of this training collaboration to drive future trauma training decisions.
