

The Healthy Human Body

These specimens provide examples of healthy anatomical structures. Healthy specimens establish a reference point for anatomical study. Comparing healthy specimens with diseased or injured tissues can help illustrate the changes caused by illness and trauma. Understanding these processes is often the first step towards improved prevention and treatment.

- 1 Head and Neck
- 2 Upper Leg Section, Plastinated
- 3 Hands Displaying Muscles and Ligaments
- 4 Knee, Sagittal Section, Plastic Embedded
- 5 Foot, Saggital Section, Plastic Embedded
- 6 Proximal Femur, Coronal Section
- 7 Proximal Humerus, Coronal Section
- 8 Skull, Beauchene Preparation
- 9 Female Reproductive System, Plastinated
- 10 Female Pelvis, Plastinated
- 11 Male Pelvis, Plastinated
- 12 Upper Torso, Transverse Section, Plastic Embedded
- 13 Pelvic Region, Transverse Section, Plastic Embedded
- 14 Kidneys and Bladder, Plastic Embedded
- 15 Kidney, Plastic Embedded
- 16 Abdomen, Transverse Section, Plastic Embedded
- 17 Thyroid, Plastinated
- 18 Spleen, Plastinated
- 19 Stomach, Plastinated
- 20 Lung, Plastic Embedded
- 21 Lung, Air Dried
- 22 Intestine, Plastic Embedded
- 23 Intestine, Plastic Embedded
- 24 Intestine with Appendix, Plastinated
- 25 Dura Mater, Plastic Embedded
- 26 Brain, Transverse Section
- 27 Liver, Plastinated
- 28 Heart, Plastinated
- 29 Upper Arm, Transverse Section, Plastinated
- 30 Head, Midface, Transverse Section, Plastic Embedded
- 31 Head, Lower Face, Transverse Section, Plastic Embedded
- 32 Brain, Plastinated
- 33 Brain
- 34 Head, Sagittal Section
